

DATE: JUNE 6, 2023

TO: MAYOR AND COUNCIL MEMBERS

FROM: SANJAY MISHRA, PUBLIC WORKS DIRECTOR

MISHA DHILLON, CAPITAL IMPROVEMENT AND ENVIRONMENTAL

PROGRAM MANAGER

SUBJECT: FISCAL YEAR (FY) 2022/23 THIRD QUARTER REPORT ON STATUS

OF CAPITAL IMPROVEMENT PLAN (CIP) PROJECTS

RECOMMENDATION

Staff recommends that the City Council receive the Fiscal Year (FY) 2022/23 Third Quarter Report on the status of Capital Improvement Plan (CIP) projects.

BACKGROUND

The CIP is a multi-year plan/forecast of the City's capital improvement projects. The first year of the CIP is the proposed capital project plan and capital budget for that fiscal year.

The City creates an updated CIP each year based on the condition of the City's current capital assets, the desire for new capital assets, and available funding. Projects in the CIP address the City's major types of capital assets: facilities, parks, sanitary sewer collection and treatment infrastructure, stormwater infrastructure, and roads. The City owns considerable capital assets in other classes as well, including streetlights, traffic control devices, sidewalks, street trees, trash capture devices, waste bins and enclosures, traffic/wayfinding signage, benches, bike racks, monument signs, fleet, and fiber optic conduit.

The CIP serves as a tool for staff to plan, implement, and manage improvements and ongoing upgrades to the City's infrastructure. The Administration and Engineering Division in the Public Works Department is responsible for identifying and completing City capital projects.

REVIEW & ANALYSIS

The City's adopted CIP (Attachment A) contains construction projects and infrastructure assessments. The infrastructure assessments included in the CIP will aid the City in identifying and prioritizing construction projects and will identify funding opportunities for future projects.

Attachment B is a summary of the CIP project lifecycle and a status of each project programmed for FY 2022/23 in the CIP as of the end of the third quarter of FY 2022/23.

Third Quarter CIP Highlights

- Sanitary Sewer Rehabilitation (SS2201)
 - On January 17, 2023, City Council awarded a contract to the lowest responsive and responsible bidder, West Valley Construction Company, Inc. for preliminary engineering design services for phase 1 of the Pinon project described in the City's recently adopted Sanitary Sewer Master Plan (SSMP). The anticipated completion date of the design work is expected to be Spring 2024. Based on a preliminary review of video inspections and SSMP, several segments of the collection system will require replacement/rehabilitation to address inflow and infiltration as well as extend the useful life of the collection system. To implement proposed improvements identified in the SSMP, the City will take a phased approach and incorporate findings from the in-pipe camera inspections.
- Playground Rubberized Surface Improvements (PA2203)
 In January 2023, the play surface was renovated at Pinole Valley Park with pour-in-place playground surfacing. This project also involves installation of new rubberized surface at Fernandez Park. The project is expected to be complete by June 30, 2023.
- Local Road Safety Plan (LRSP) (IN2104)
 On February 21, 2023, the City Council adopted Resolution 2023-17 adopting the City's LRSP. A LRSP is a mechanism through which local governments identify roadway safety issues in their jurisdictions to develop a list of countermeasures for priority intersections and roadways segments based on collision analysis and feedback stakeholders. This project is complete, and the recommendations will be incorporated into the upcoming CIP.
- Traffic Safety Improvements on the Tennent Avenue Corridor On February 21, 2023, City Council appropriated \$110,000 for immediate improvements at two intersections on Tennent Ave at Pear and Plum St. The goal of these improvements is to reduce traffic speed and offer shorter crossing distances for pedestrians crossing the crosswalks. The work involves installation of high visibility continental crosswalks on all legs of both intersections, and interim curb extensions using pavement markings and flexible delineator posts. In addition, Rectangular Rapid Flashing Beacons will be installed at the Tennent Ave. and Plum St. intersection. This work is expected to be complete before the end of the calendar year.
- Electric Vehicle (EV) Charging Stations (FA2002)
 This project will install a Level II dual port charging station at the parking lot serving the Public Safety Building. On November 15, 2022, City Council awarded a contract to Lord's Electric for the project. However, due to supply chain issues,

there was a twelve-week lead time on the charging equipment. The building code requires that the EV charging stations are constructed to be ADA-compliant which includes adequate space for exiting and entering the vehicle, unobstructed access to the charger, free movement around the charger and connection point on the vehicle. A side access aisle is also required to allow space for wheelchair and equipment in and out of the space. The project involves concrete removal and demolition, concrete placement, striping, signage, conduit installation, conductor installation, general electrical work, and installation of electric vehicle charger. While waiting for the charging equipment, the Contractor completed work related to the sidewalk, curb ramp, and installed electrical conduit. The anticipated completion date of the project is June 30, 2023.

Active Transportation Plan (ATP) (IN2106)
 On March 7, 2023, City Council awarded a contract to GHD, Inc. to provide professional and technical planning services to develop an ATP. The ATP will outline strategies and actions to support and encourage active modes of transportation such as walking, biking, and taking public transit. This work will involve a review of current plans and policies, production of 10% concept designs which incorporate community feedback, feasibility analysis including traffic data collection, and cost estimates for recommended projects.

FISCAL IMPACT

Projects have budgeted sources of funds which have been previously approved by City Council. There is no fiscal impact associated with this status update.

Introduction

The Capital Improvement Plan (CIP) is a multi-year planning tool used to identify and implement the City's capital needs over the upcoming five-year period. The CIP aligns the needs with appropriate funding, scheduling, and implementation. This document is a working blueprint for building and sustaining publicly funded physical infrastructure. Capital improvements refer to physical assets and include the design, purchase, construction, maintenance, or improvement of public resources (i.e. parks public infrastructure, equipment, public spaces). These improvements influence Pinole's built and natural environment and help guide the trajectory of future growth or change.

The projects in the CIP fall into the following broad categories: facility maintenance, parks, sewer collection and treatment, stormwater, streets and roads. These projects are developed in collaboration with department heads, and division managers under the direction of the City Manager to ensure all department needs are represented.

The CIP is reviewed and updated annually for capital projects and programs that support City goals and objectives including priorities identified in the 2020-2025 Strategic Plan of developing a disciplined approach to funding infrastructure maintenance and improvements. The City seeks to enhance its focus on the state of the infrastructure throughout the community by first inventorying all the assets, assessing their contributions to a safe and vibrant Pinole, assessing their current conditions, and creating a disciplined investment approach resulting in a strong and purpose driven Capital Investment Plan.

The preparation and adoption of the CIP is an important part of Pinole's financial planning and budgeting process. Proposed projects are reviewed by the Planning Commission for consistency with the General Plan. The Finance Subcomittee also reviews and analyzes all aspects of the CIP and makes recommendations. Project priority and selection is based on specific criteria, such as:

- Consistency with community plans and policies;
- Regulatory compliance;
- Public and political support;
- Sustainability;
- Cost savings or revenue generation;
- Project demand, determined by inventory of existing land, equipment, and facility conditions;
- Economic, environmental, aesthetic or social impacts; and
- Public health, safety or other legal concerns.

The process for developing the CIP involves the following steps:

CIP Review by Prioritize projects Finance Implementation of Identify projects for CIP budget Prepare budget City Council and identify Subcommittee approved projects for CIP adoption and Planning fundina in CİP Commission

City of Pinole 83 of 8Page 1 of 67

Next Steps in City Capital Planning

The City will complete condition assessment of all the City's capital assets and identify the funding levels required to maintain these assets. The City will continue to integrate capital planning information into the Long-Term Financial Plan, so City decision makers are aware of the City's capital needs when they consider allocation of the City's limited financial resources and consider possibly pursuing additional sources of City revenue.

Project Funding

A variety of funding sources support projects listed in the CIP. The first year's program in the CIP is adopted by the City Council as the Capital Budget, as a counterpart to the annual Operating Budget. The fiscal resources are appropriated only in the first year, the subsequent four years of the CIP are important for long term planning and subject to further review and modification.

The CIP is funded primarily with funds restricted for specific purposes. The next page descibes various funding sources and their restrictions. Some projects are entirely or partially funded by grants and reimbursements from state and federal government and other agencies.

City of Pinole 84 of 8**29**ge 2 of 67

Funding Sources

Fund#	Fund Name	Description
Fulla#	(restriction)	Description
100	General Fund (unrestricted)	The General Fund is the main operating fund for the City. It accounts for sources and uses of resources that (primarily) are discretionary to the City Council in the provision of activities, programs and services deemed necessary and desirable by the community.
106	Measure S 2014 (unrestricted)	Accounts for 2014 voter-approved half-cent Local Use Tax which levies 0.5% each on all merchandise. Although these are unrestricted General Fund revenues, the 2014 Use Taxes have been allocated by the City Council to fund Infrastructure Projects as their highest funding priority.
200	Gas Tax - RMRA (roads and right-of- way)	Accounts for the Highway Users Tax (HUTA) State imposed excise taxes on gasoline and diesel fuel sales within the City limits. Gas Tax funds are restricted for use in the construction, improvement and maintenance of public streets. The taxes are allocated to Pinole through the Road Maintenance and Rehabilitation Account (RMRA) established by the Road Repair and Accountability Act of 2017.
214	Solid Waste	Accounts for special revenue received from Republic Services from a surcharge assessed on customer rates for solid waste services. These funds are set aside for future solid waste capital and for a rate stabilization fund.
215	Measure J (roads only)	Accounts for special sales tax revenues collected by Contra Costa Transportation Authority (CCTA) and reapportioned to cities for local street projects. This fund also accounts for return to source funds and grant funds.
276	Growth Impact Fees (nexus identified needs)	Accounts for development fees collected to mitigate the impact of new development. Provides funds for nexus identified needs only.
325	City Street Improvements (roads only)	Accounts for funds set aside by the City of Pinole to fund street improvement projects. The Measure S 2014 funding plan allocates \$250k annually to this fund.
327	Park Grants (parks only)	Accounts for grants and reimbursements from the state and federal government and other agencies related to parks.
377	Arterial Street Rehabilitation (roads only)	Accounts for funds set aside by the City of Pinole to fund arterial street rehabilitation projects. The Measure S 2014 funding plan allocates \$250k annually to this fund.
500	Sewer Enterprise (sewer only)	Accounts for fees charged to residents and businesses for sewer utilities. Fees are used to operate the Pinole-Hercules Water Pollution Control Plant which services the Pinole and Hercules areas.

City of Pinole Capital Improvement Plan: FY 2022/23 through 2026/27 85 of 8**29**ge 3 of 67

Grants

Certain projects are eligible to receive grant funds from state, federal, or other agencies. Road projects listed in the CIP receive grant funding from a variety of sources such as:

- California Department of Transportation (Caltrans)
 - o Highway Bridge Program (HBP) funds to improve bridge structural safety.
 - Project: RO1710
 - Highway Safety Improvement Program (HSIP) funds projects that significantly reduce fatalities and injuries on all public roads.
 - Project: IN2104
- West Contra Costa Transportation Advisory Committee (WCCTAC)
 - Subregional Transportation Mitigation Program (STMP) funds projects that provide congestion relief and mitigate traffic impacts on regional routes through capacity improvements on those routes, improved transit services for subregional and regional travel, and improved facilities that allow West County residents to more efficiently access regional routes and transit service.
 - Projects: RO2105, RO1902, and RO1710
- Metropolitan Transportation Commission (MTC)
 - One Bay Area Grant 2 (OBAG2) policy framework for MTC's distribution of federal State Transportation Program and Congestion Mitigation and Air Quality Improvement Program funds. The OBAG2 program provides funding for local street and road maintenance, streetscape enhancements, bicycle and pedestrian improvements, Safe Route to School projects, Priority Conservation Areas, and Transportation planning.
 - Project: RO1714
 - Transportation Developlment Act (TDA) Article 3 funds construction and/or engineering of bicycle or pedestrian capital or quick build projects, maintenance of Class I or Class IV separated bikeways, bicycle and/or pedestrian safety education projects, development of a comprehensive bicycle or pedestrian facilities plans, and restriping Class II bicycle lanes and buffered bicycle lanes.
 - Project: RO1714

The receipt of certain grants and reimbursements typically follow the award of contracts; therefore, other City funding is programmed for front-end financing of the total estimated project costs.

City of Pinole 86 of 8**29**ge 4 of 67

Overview of Recommended Capital Budget

The FY 2022/23 – 2026/27 CIP contains 36 planned public improvement projects, which includes 10 new projects. In addition, there are 9 infrastructure assessments programmed for FY 2022/23 – 2026/27. The CIP also contains information for 24 unfunded and unprogrammed projects. A funded project is one that has identified specific funding, including on-going existing resources to fully implement the project. A partially funded project has funding to accomplish various phases of the project but lacks sufficient funding to complete the project. An unfunded project is one that has been identified in the CIP as a need but no funding secured to implement the project. Should funding become available through grant or other sources, the unfunded list can be reviewed to determine if it is suitable to seek such funding.

CIP projects fall into the following categories: Facilities, Parks, Sanitary Sewer, Stormwater, Streets & Roads, and Infrastructure Assessments. The nomenclature for the project number is derived as follows:

Project numbers begin with the abbreviation of the project category, followed by the year the project was first programmed, and then a unique sequence number. For example, FA2001 refers to a facilities project which was first programmed in 2020 with a unique sequence number of 01. Unfunded projects begin with UF and are followed by a unique sequence number.

Category	Abbreviation
Facilities	FA
Parks	PA
Sewer	SS
Stormwater	SW
Streets &	RO
Roads	
Infrastructure	IA
Assessments	
Unfunded	UF

In FY2022/23, there are 23 public improvement projects and 8 infrastructure assessments programmed. Below is a summary of the various funding sources based on project category.

PINCILE PUBLIC SAFETY FACERY

92 of **B29**e 10 of 67

Description: To extend the useful life of the Public Safety building, there are several items that require attention including but not limited to replacement of the HVAC system, carpet, flooring, water heaters, light fixtures, fans, etc. In addition, the building requires painting (interior and exterior), and the locker rooms also require renovation.

FA2201 - Faria House Renovations

Initial Project Start: July 1, 2022
Initial Project Completion: June 30, 2023

Revised Project Start:

Revised Project Completion:

Project Origin: Council Request

Multi-year Project: No

Description: The building commonly referred to as the "Faria House" is a two-story residence constructed in about 1890 and originally located at what is now 1301 Pinole Valley Road. In 2005, the Faria House was relocated to 2100 San Pablo Avenue. On June 7, 2022, City Council directed staff pursue hazard remediation and renovations to create a lower-level office, and upper-level warm shell. The first step is the site remediation to removal all hazardous materials (i.e., asbestos and/or lead based paint) from the first and second floors. This will involve removal of all interior baseboard, door, window trim, lath and plaster (from the ceilings and walls). This will also include removal of all lighting and plumbing fixtures, kitchen "built-in-place" cabinets. Once the site remediation is complete, the lower level of the structure will be ready for tenant improvement for an office use. The upper level will be a warm shell, which means that the upper level will be fully insulated, with walls open and ceiling covered with wallboard, but no other improvements beyond the hazard mitigation work. The upper level would be separated from the lower level with secured "temporary" framing and wallboard partition wall built at the top of the stairs. The lower level will have rough electrical, plumbing, and mechanical installation for an office use. All lower-level rooms would have new wall and ceiling insulation installed and covered with new drywall. The kitchen would remain in the same location, the dining room, which would become the conference room/meeting room would include low-voltage, data, communications for teleconferencing, meetings, the existing bathroom would become a single All Gender restroom, renovated to meet ADA compliance, the existing rooms would become office suites with new electrical sub-panel, rough electrical, rough plumbing and rough mechanical installed. Lower-level rooms will have renewed (or new) flooring, baseboard, and doors etc.

Budget:

	Fund	Prior Funding	FY	2022-23	FY 2023-24	FY 2024-25	FY 2025-26	FY 2026-27						
Construction	106		\$	420,000										
	Subtotal		\$	420,000										
	Total Co	Total Cost Estimate: \$420,000												

FA2002 - Electric Vehicle Charging Stations

Initial Project Start: July 1, 2020
Initial Project Completion: June 30, 2021

Revised Project Start:

Revised Project Completion: December 30, 2022

Project Origin: Council Request

Multi-year Project: Yes

Description: This project will install a level II dual port electric vehicle charging station at the parking lot serving the Public Safety Building.

Supplemental Information: City staff continue to assess other public locations throughout Pinole for opportunities to incorporate EV charging infrastructure. An energy audit (Project IN2201) of City owned facilities will inform future installations of electric vehicle charging stations.

Budget:

FA1902 - Energy Upgrades

Initial Project Start: July 1, 2020
Initial Project Completion: June 30, 2021

Revised Project Start:

Revised Project Completion: June 30, 2023 **Project Origin:** End of life cycle

Multi-year Project: No

Description: The heating, ventilation, and cooling (HVAC) systems at City Hall and Senior Center have reached the end of their useful life and need to be replaced. A portion of the roof at the Senior Center will also need to be replaced.

Supplemental Information: In October 2020, City staff began working with Marin Clean Energy's (MCE's) Energy Efficiency program to explore opportunities for energy conservation and generation at City owned facilities by replacing the HVAC systems and upgrading streetlights. It was determined that the MCE program could not incentivize HVAC replacement project or the upgrade of the streetlights. This project was formerly known as FA1706 and FA1801. In April 2021, the AC unit at City Hall broke down and was replaced.

Budget:

FA1901 - Senior Center Auxiliary Parking Lot

Initial Project Start: July 1, 2020
Initial Project Completion: June 30, 2021

Revised Project Start:

Revised Project Completion: June 30, 2024

Project Origin: Fowler Lot Re-Use Committee

Multi-year Project: Yes

Description: On April 16, 1990 City Council adopted Resolution 2380 authorizing the purchase of 2548 Charles Street. At the time of purchase, City Council determined that construction of a Senior Center was necessary, and that this property was needed to provide sufficient parking for the Center. The parcel is surrounded by municipal parking lots which serve the Senior Center and Old Town Pinole. On February 2, 2021 City Council adopted Resolution 2021-07 and awarded a contract to a consultant for the preliminary engineering and design for the parking lot. The parking lot will be designed to be a multi-benefit project that includes pavement structural section, striping, lighting, bicycle parking, electric vehicle charging stations, stormwater capture and retention, and drought tolerant landscaping. The final design will offer the maximum number of parking spaces while allowing access for both vehicles and pedestrians and include aesthetic design components. On June 7, 2022, City Council directed staff to incorporate the installation of a solar canopy at the site.

Supplemental Information: The Fowler House tenants remained in the properly till 2010 and many discussions took place to determine the best use of the property. It was determined that the house had asbestos and lead paint. On July 17, 2018, City Council adopted Resolution 2018-67 to create the Fowler Lot Re-use Committee to evaluate the reuse and redevelopment of the property. The Committee evaluated uses for the lot and determined the best use of the property is a parking lot. On October 16, 2018, the City Council adopted Resolution No. 2018-93 to approve a contract with a construction company to abate and demolish the Fowler house. The property demolition was completed on March 11, 2019. On July 21, 2020, City Council adopted Resolution 2020–68 to accept the final recommendation of the Committee.

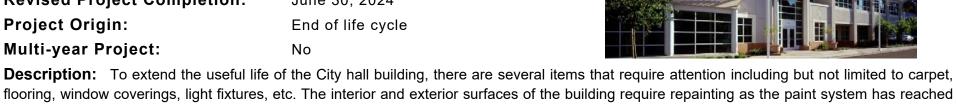

Budget:

FA1703 - City Hall Modernization (formerly known as Paint City Hall)

Initial Project Start: July 1, 2021 **Initial Project Completion:** June 30, 2022 **Revised Project Start:** July 1, 2022 **Revised Project Completion:** June 30, 2024 **Project Origin:**

Multi-year Project: No

flooring, window coverings, light fixtures, etc. The interior and exterior surfaces of the building require repainting as the paint system has reached the end of its useful life. Exterior painting is necessary to maintain external protection from the environment. Fading, chipping paint, along with water and mildew damage necessitates the painting project.

FA1702 - Citywide Roof repairs and replacement

Initial Project Start:

Initial Project Completion:

Revised Project Start:

Revised Project Completion:

July 1, 2022

July 1, 2022

June 30, 2024

Project Origin:

End of life cycle

Multi-year Project: Yes

Description: In 2015, comprehensive visual roof inspections were completed by a contractor on various City owned facilities. The purpose of the inspection was to identify the extent, if any, of moisture intrusion into the existing roof assemblies, document observed roof system deficiencies, determine the overall condition of the existing roof systems and to estimate the service life of the in-place roof assemblies. The roof inspection identified several roofs which need to be repaired or replaced. The roofs at City hall and the Public Safety building need to be replaced.

Initial Project Start: July 1, 2021
Initial Project Completion: June 30, 2022

Revised Project Start:

Revised Project Completion: June 30, 2023

Project Origin:Beautification Ad Hoc Committee

Multi-year Project: No

Description: Installation of high capacity, solar powered compacting trash bins at City parks. To get the best value and uniformity at City parks, a RFP will be released to solicit proposals from qualified vendors to provide these bins. Exact costs will not be known until the bidding is complete however staff estimates that 40 bins will be procured for the budgeted project cost.

Supplemental Information: In 2019, the City Council established a Beautification Ad Hoc Committee to analyze options for, and to make recommendations to the Council regarding clean-up and beautification projects in Pinole. Among other projects, the Committee recommended the installation of high capacity, solar powered compacting trash bins at City parks.

Description: There are two soccer fields at Pinole Valley Park which are utilized on an annual basis, the Wright Avenue Soccer Field at the southerly end, and Savage Avenue Soccer Field at the northern end. Both fields are heavily used by soccer leagues and the general public. The Savage Avenue Soccer Field requires substantial rehabilitation which includes: upgrading the irrigation system and ongoing turf maintenance. Turf maintenance includes mowing, fertilizing, aeration, overseeding, and topdressing.

Supplemental Information: This project has been delayed pending the development of a Park Master Plan (CIP Project# PA1704).

SW1901 - Hazel Street Storm Drain Improvements

Initial Project Start: July 1, 2020
Initial Project Completion: June 30, 2021

Revised Project Start:

Revised Project Completion: June 30, 2023

Project Origin: Development Driven

Multi-year Project: Yes

Description: The existing stormwater collection is an open trench system and needs to be converted to an underground conveyance system to facilitate construction of a through road. This project will include connecting the existing storm drain network within Hazel Street between 1087 Hazel St (eastern limits) and 1081 Hazel St. (western limits). In January 2020, the City contacted with Schaff and Wheeler to prepare the preliminary design which includes plan and profile of the pipe and technical specifications.

Supplemental Information: This conversion also aids in compliance with the MSP4 by reducing the potential of contaminants including litter from entering the stormwater system.

Budget:

RO2102 - Tennent Ave. Rehabilitation

Initial Project Start: July 1, 2020
Initial Project Completion: June 30, 2023

Revised Project Start:

Revised Project Completion: June 30, 2025

Project Origin: Pavement Management Program

Multi-year Project: Yes

Description: The construction impacts from the WPCP upgrade project resulted in pavement deterioration. This project will rehabilitate Tennent Ave. from San Pablo Ave. to WPCP. In February 2021, the City selected a consultant to complete the preliminary engineering for this project.

Supplemental Information: In preparation of this project, the City retained a consultant to perform internal CCTV on this section of roadway. The inspection was completed in early 2021. Coordinating collection system improvements with street resurfacing projects ensures that sewer improvements are made prior to the resurfacing so that manholes and valve covers may be properly realigned, and repairs and replacements are made in a cost-effective manner. This also avoids cutting and patching recently paved streets. The City of Hercules will reimburse \$86,430 for this project.

Budget:

Initial Project Start: July 1, 2021
Initial Project Completion: June 30, 2022

Revised Project Start:

Revised Project Completion: June 30, 2023

Project Origin: Staff Recommendation

Multi-year Project: Yes

Description: Completion of preliminary engineering and design to provide continuous sidewalks and bike lanes along Appian Way beginning from unincorporated El Sobrante to about 1500 lineal feet north of the City limit within Pinole. In December 2021, City Council approved a Cooperative Funding Agreement with WCCTAC to receive STMP funds to complete preliminary design for this project.

Supplemental Information: This project will connect with the Contra Costa County's project to provide continuous sidewalks and bike lanes along Appian Way from San Pablo Dam Rd. in unincorporated El Sobrante. This project will involve coordination with Contra Costa County. The construction phase of this project is unfunded and appears in the Unfunded and Unprogrammed list.

Initial Project Completion: June 30, 2021

Revised Project Start:

Revised Project Completion: June 30, 2025

Project Origin: Staff Recommendation

Multi-year Project: Yes

Description: In 2018, the East Bay Regional Park District completed a trail link to connect Pinole Shores Regional Shoreline to Bayfront Park trail. There remains one very small gap on Tennent Ave. from Bayfront Park to Railroad Ave. Improvements to Tennent Ave. at the Railroad Crossing will facilitate safe movement of bicycles and pedestrians. Since project inception, the scope of work has evolved to include improvements that would maximize parking on Railroad Avenue for park users. In February 2021, the City selected a consultant to complete the preliminary engineering for this project.

Supplemental Information: WCCTAC held its STMP Call for Projects in 2018 which committed \$100k in funding for preliminary engineering from the 2006 STMP program for this project. This project is eligible to respond to future STMP Call for Projects to compete for funding to advance the project through construction.

RO1710 - San Pablo Avenue Bridge over BNSF Railroad

Initial Project Start: July 1, 2017

Initial Project Completion: Beyond 5 year term

Revised Project Start:

Revised Project Completion: June 30, 2026 **Project Origin:** End of life cycle

Multi-year Project: Yes

Description: The San Pablo Avenue bridge over the Burlington Northern Santa Fe Railroad is an integral part of the area's transportation network. The age and condition assessment of the bridge supports replacement. The City was approved for initial funding from the Caltrans Highway Bridge Program (HBP). In February 2020, the City awarded a contract to a consultant for preliminary engineering (PE) to advance the project. The PE will be completed in two phases due to funding limitations. Completion of preliminary design is necessary to develop a final cost estimate for the project. Unfunded portions of this project appear in the Unfunded and Unprogrammed project list as Project UF022.

Supplemental Information: The total budget identified to complete the PE exceeds the amount of funding Caltrans committed to the project of the State's share in the current HBP.

RO1714 - Safety Improvements at Appian Way and Marlesta Rd. (formerly known as HAWK at Appian Way and Marlesta Rd.)

Initial Project Start:

Initial Project Completion:

Revised Project Start:

Revised Project Completion:

July 1, 2024

July 1, 2025

July 1, 2020

June 30, 2023

Project Origin: TAPS
Multi-year Project: Yes

Description: The key elements affecting the safety of pedestrians and cyclists at the Appian Way and Marlesta Way intersection is speed and reduced visibility of approaching traffic due to the topography of the project area. Safety improvements are required to improve crossing conditions for pedestrians and bicyclists. In February 2021, the City selected a Consultant to complete the preliminary engineering for this project.

Supplemental Information: The City secured grant funds to install a traffic signal at this intersection instead of a HAWK.

Budget:

	Fund		Prior unding	FY	2022-23	FY 2023-24	FY 2024-25	FY 2025-26	FY 2026-27

IN2103 - Recycled Water Feasibility

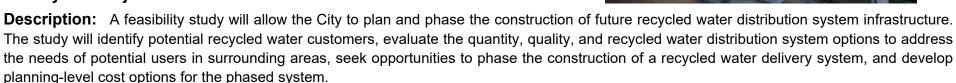

Initial Project Start: July 1, 2022
Initial Project Completion: June 30, 2023

Revised Project Start:

Revised Project Completion: June 30, 2024

Project Origin: Council Request

Multi-year Project: Yes

Supplemental Information: Recycled water delays or eliminates the need to construct more potable water facilities, sustains the economy with increased water supply reliability, protects the environment, safeguards investments in parks and landscaping with drought proof or drought resistant water supply, and contributes to a green and healthy environment. In 2019, East Bay Municipal Utility District (EBMUD) prepared an Updated Recycled Waster Plan which considered the potential for potable reuse in EBMUD's water service area. The development of a new recycled water supply for the Phillips 66 refinery in Rodeo using effluent from the Pinole-Hercules and Rodeo wastewater treatment plants was among the recommended non-potable reuse projects. This project is estimated to deliver up to 3.67 MGD of recycled water to the refinery for use in their boilers and cooling towers. The combined final disinfected effluent from both plants would be pumped at the Rodeo Pump Station to the refinery for treatment a new advanced recycled water treatment plan. This project was recommended by EBMUD because it would deliver a large amount of water to a single customer, with comparatively few pipelines required due to the short distance between the sources of wastewater and the Phillips 66 Refinery

Revised Project Start:

Revised Project Completion: December 30, 2022

Project Origin: Staff Recommendation

Multi-year Project: Yes

Description: In September 2020, the City Council awarded a contract to Carollo Engineers, Inc. to develop a Sanitary Sewer Collection System Master Plan (Plan). The Plan will provide a condition assessment of the sewer collection assets to inform capital planning and effectively serve the wastewater needs of residents and businesses. This plan will also provide a capacity analysis to identify pipes that need to be upsized. Master planning is critical to identify when and where infrastructure upgrades or improvements will be needed to accommodate growth.

Potential Funding Sources:

UF002 - Electric Vehicle Charging Stations in City lots

Project Information

The City desires to promote and encourage the use of electric vehicles. With increased adoption of alternative fuel vehicles, the need for charging infrastructure is growing. The City wishes to install charging stations in city owned parking lots. The first step is to complete a load study at City owned parking lots to determine the electrical capacity at each site. There may be significant electrical upgrades necessary to install charging stations. Electrical capacity and siting determine ultimately determine the cost of each project. There are incentives available for the charging equipment.

CIP Project Lifecycle and Project Status Summary

CIP projects usually have five major phases of their lifecycle, described below.

- Initiation: Projects in the CIP are selected and prioritized based on specific criteria such as consistency with master plans and policies, regulatory requirements, health and safety impacts, and community benefits. The funding is identified for projects and a capital budget is presented to Council for consideration. Once the CIP is adopted by City Council, staff is responsible for project implementation. The initiation phase involves determining whether the project will be managed by City staff or a consultant, assigning the project to a manager, and assembling the project team.
- Planning: The assigned project manager develops the scope, preliminary schedule, and funding requirements, and identifies stakeholders.

Construction projects can be completed through several delivery methods, including design-build and design-bid-build. In design-build, the same firm/team of firms is selected to design and build the project, whereas in design-bid-build one firm designs the project, then the construction is bid, and a construction firm builds the project. Depending on the delivery method, a construction project can involve several steps which may include design, bid, award, construction, and closeout.

For non-construction projects such as master planning, staff defines the initial project by identifying major goals and objectives.

Throughout the project lifecycle, coordination and engagement with various stakeholders is necessary. Stakeholders can include the community, business owners, utilities, funding partners, and other interested and affected parties.

• Execution: For construction projects, the project plans and specifications, and preliminary costs estimates, are prepared. Typically, there are three levels of design review which allow opportunity for coordination and input with stakeholders, utilities, funding partners, and regulatory agencies. The design review usually occurs at 35, 65, and 90 percent of design completion. As the design progresses through each level, the cost estimate becomes more precise. The completed design is reviewed and approved by the City Engineer.

For a design-bid-build project, the final approved design goes out to bid. The project cost estimate and source of project funding govern which procurement policies and procedures will apply. The City's procurement policy establishes the standards for purchase of goods, services, and supplies. Projects involving federal or State grant funds typically involve stricter and more formalized procedures. In addition, high value public works projects must adhere to

processes established in the California Public Contract Code. A contract is awarded to the most qualified and responsible vendor.

After a contract is awarded and executed with the appropriate insurance and bonds, project construction can begin. The project size and complexity dictate the length of the construction phase.

For master plans, stakeholders are engaged, and links are identified among other infrastructure plans, the General Plan, and other applicable City plans. Next, solutions including conceptual alternatives are developed. Viable solutions are evaluated to ensure they meet the goals and needs of the project. The master plan is a final document which contains a recommended program and/or capital project list.

- Monitoring: Throughout the project lifecycle, staff oversees and monitors the project. Construction projects involve construction management, contract compliance, and project management services, which include technical and administrative tasks. Staff is also responsible for grant administration for projects that are funded by grants.
- Closure: Once construction projects are complete, the as-built drawings are filed for future reference. Closeout activities involve completing project related paperwork including filing the notice of completion with the Contra Costa County Recorder's office. For master plans, the final plan is presented to City Council.
